Landing Page

Editorial luxury design

The Arc landing page introduces the brand with a premium editorial feel. Serif headlines, the signature Arc curve mark, and a museum-style provider card set the tone.

- Full-page editorial layout with 6 distinct sections
- Warm ivory/espresso/brass palette
- Signature Arc curve mark
- Live at arc-marketplace.vercel.app

Sign In

Split-panel authentication

Two-panel layout: form on the left, branded dark panel with Arc mark on the right. Social sign-in buttons for Apple and Google are ready for integration.

- Email + password with real-time validation
- Error messages when credentials are wrong
- Apple and Google social sign-in (ready to wire)
- Forgot password link
- Link to registration

The screenshot displays a sign-in interface for 'Arc'. It is a split-panel design on a light beige background. The left panel is a white form titled 'Welcome back' with the subtitle 'Sign in to your Arc account'. It contains an 'Email' field with the placeholder 'you@example.com', a 'Password' field with a 'Forgot password?' link, a 'Sign In' button, and social login options for 'Apple' and 'Google'. A link for 'New to Arc? Create an account' is at the bottom. The right panel is a dark brown branded area featuring the Arc logo (a stylized 'A' with a dot), the tagline 'Exceptional beauty, anywhere.', and a description: 'Your connection to vetted barbers, nail artists, lash techs, and makeup professionals.' At the very bottom of the page, a small line of text reads: 'By continuing, you agree to our Terms and Privacy Policy.'

Create Account

Role-based registration

New users choose between Client and Professional roles. The branded panel adapts its messaging. All form validation is real.

- Client / Professional role toggle
- Branded panel with role-specific copy
- Form validation with error feedback
- Redirects to dashboard on success

About Arc

Brand manifesto

Five brand pillars presented in a numbered chapter layout, followed by the Arc brand promise in a dark section with brass accents.

- Five brand pillars with editorial numbering
- Dark promise section with the Arc tagline
- Consistent serif typography throughout

Screenshot: About Arc

Pricing

Transparent fee structure

Two-tier pricing: free for clients, 2.9% per transaction for professionals. A 5-question FAQ answers the most common concerns.

- Free tier for all clients
- 2.9% transaction fee for professionals
- FAQ section with plain-language answers
- Clear call-to-action buttons

Screenshot: Pricing

Provider Dashboard

Personalized home screen

The dashboard greets the provider by name with a time-of-day message. Quick access cards, a calendar widget, and monthly stats provide an at-a-glance overview.

- Personalized greeting (Good morning, Marcus)
- 6 quick-access navigation cards
- Interactive calendar widget
- Monthly stats: Bookings, Revenue, Messages
- Today's schedule with helpful empty state

Screenshot: Provider Dashboard

Booking Management

Full appointment lifecycle

Providers manage all bookings with tabbed filtering by status. Each booking has action buttons to confirm, start, or complete. Detail dialogs and cancel confirmations are built in.

- 5 status filter tabs (Pending through All)
- Data table with structured columns
- One-click status actions per booking
- Detail dialog with full appointment info
- Cancel confirmation with optional reason

Screenshot: Booking Management

Schedule & Availability

Calendar-powered scheduling

Providers set weekly availability with day toggles and time pickers. The calendar preview on the right highlights available days in bold and unavailable days faded.

- 7-day availability grid with on/off toggles
- Start and end time pickers per day
- Calendar preview with visual availability
- Active day counter (6 of 7 days active)

Service Management

Add and manage offerings

Providers list their services with name, category, duration, and pricing. The empty state guides new providers to add their first service.

- Add service form with all fields
- Category, price, and duration per service
- Active/inactive status toggle
- Guided empty state for new providers

Screenshot: Service Management

Earnings & Payouts

Revenue tracking with Stripe

Total earnings display with payment history. Stripe Connect integration lets providers manage their payout account directly from the dashboard.

- Total earnings summary
- Stripe Connect account management
- Payment history with service details
- Clean \$0.00 starting state

Screenshot: Earnings & Payouts

Messaging

Split-panel chat interface

A real messaging interface with conversation list on the left and chat thread on the right. Search filters conversations. Message bubbles distinguish sent from received.

- Split-panel layout (conversations + thread)
- Search conversations by name
- Message bubbles with timestamps
- Compose bar with send button
- Mobile responsive (list → thread with back button)

Screenshot: Messaging

Integrations

Connect external services

Google Calendar for two-way booking sync, Instagram for automatic portfolio imports. A Coming Soon section previews planned integrations.

- Google Calendar — real OAuth connection flow
- Instagram — portfolio auto-import (coming soon)
- Feature checklists per integration
- Planned: Apple Calendar, Booksy, Square, Vagaro, TikTok

Screenshot: Integrations

Calendar Settings

Sync configuration

Google Calendar connects via OAuth for real-time two-way sync. ICS feed import supports Booksy, Vagaro, Acuity, and any app with calendar export.

- Google Calendar OAuth connection
- ICS/iCal feed URL import
- How calendar sync works — 3-card explainer
- Sync status and event counts

The screenshot shows the 'Settings' page of the Arc app. The top navigation bar includes 'Arc', 'Discover', 'Journal', 'About', 'Dashboard', and a 'Sign Out' button. A left sidebar lists various app features, with 'Settings' highlighted. The main content area is titled 'Settings' and includes a sub-header: 'Connect your existing calendars so bookings stay in sync.'

There are two main configuration sections:

- Google Calendar:** Described as 'Two-way sync — external events block your ARC availability, and ARC bookings appear in Google Calendar.' It features a 'Connect Google Calendar' button.
- Calendar Feed (ICS):** Described as 'Import events from Booksy, Vagaro, Acuity, or any app that exports an ICS/iCal feed. One-way sync (read only).' It includes a text input field for a URL (pre-filled with 'https://calendar.booksy.com/feed/...') and an 'Import feed' button.

Below these sections is a 'How calendar sync works' section with three explanatory cards:

- Blocks your time:** 'Events from your external calendar automatically block those time slots in ARC. Clients only see truly available times.'
- Writes ARC bookings:** 'When a client books through ARC, the appointment appears in your Google Calendar automatically (Google Calendar only).'
- Syncs every 15 min:** 'Google Calendar syncs in real-time via push notifications. ICS feeds are checked every 15 minutes.'

Screenshot: Calendar Settings

What's Next

Roadmap priorities for the next sprint

Deploy the API

The Express + PostgreSQL backend is built and tested. Next: deploy to Fly.io or Railway so the live site authenticates real users and manages real bookings.

Email Verification

Users verify their email before accessing the platform. Prevents fake accounts and builds trust with providers.

File Upload

Portfolio images, avatars, and review photos need a real upload mechanism with image optimization.

Notifications

Push notifications for booking confirmations, cancellations, and new messages across email, in-app, and mobile.

On-the-Go Mode

Mobile service delivery: providers toggle availability for house calls with travel radius and base fee.

No-Show Policy

Provider-configurable cancellation fees and deposit handling through Stripe.

Questions? Feedback? Let's discuss.
